

### Description

The PJ1117 Series are low-dropout three-terminal Linear regulator circuit with positive voltage output. They are divided into two versions, fixed voltage output version and adjustable voltage output version: The fixed output voltage is 1.2V, 1.8V, 2.5V, 3.3V, 5V and the adjustable version can provide the output voltage from 1.25V to 12V with only 2 external resistors.

### Features

- Quiescent Current: 2mA(Typ.)
- Maximum Output Current: 1.0A
- Range of Operation Input Voltage: Max.15V
- Current Limiting
- Thermal Shutdown
- Operation Ambient Temperature: -40~85°C
- Available Packages: SOT-89, SOT-223, TO-252

### Applications

- LCD Monitor and LCD TV
- DVD Decode Board
- ADSL Modem

## Typical Application Circuit

The PJ1117 Series have adjustable version and six fixed versions (1.2V, 1.8V, 2.5V, 3.3V and 5V)

### Fixed Voltage Output Version

1. Recommend using 10uF tan capacitor as bypass capacitor (C1) for all application circuit.
2. Recommend using 10uF tan capacitor to assure circuit stability.

### Adjustable Voltage Output Version

The output voltage of adjustable version follows the equation:  $V_{OUT} = 1.25 \times (1 + R2/R1) + I_{ADJ} \times R2$ . We can ignore  $I_{ADJ}$  because  $I_{ADJ}$  (about 50uA) is much less than the current of  $R1$  (about 2~10mA).

- (1). To meet the minimum load current (>10mA) requirement,  $R1$  is recommended to be 125Ω or lower. As PJ1117XX-ADJ can keep itself stable at load current about 2mA,  $R1$  is not allowed to be higher than 625Ω.
- (2). Using a bypass capacitor ( $C_{ADJ}$ ) between the FB pin and ground can improve ripple rejection. This bypass capacitor prevents ripple from being amplified as the output voltage is increased. The impedance of  $C_{ADJ}$  should be less than  $R1$  to prevent ripple from being amplified. As  $R1$  is normally in the range of 100Ω~500Ω, the value of  $C_{ADJ}$  should satisfy this equation:  $1/(2\pi \times f_{ripple} \times C_{ADJ}) < R1$ .

## Pin Distribution

**SOT-89**

**SOT-223**

**TO-252**

## Functional Pin Description

Pin Name	Pin Function
GND/ADJ	Ground/Adjustable Pin
VOUT	Output Voltage
VIN	Power Input Voltage

## Ordering Information

### Note:

RoHS: PJ defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials.

Green: PJ defines "Green" to mean Halogen-Free and Antimony-Free.

## Function Block Diagram

## Absolute Maximum Ratings <sup>Note1</sup>

Ratings at 25°C ambient temperature unless otherwise specified.

Parameter	Symbol	Rating	Unit
Supply Voltage	V <sub>IN</sub>	18	V
Maximum Output Current	I <sub>OUT</sub>	1	A
Power Dissipation <sup>Note2</sup>	P <sub>D</sub>	Internally Limited	--
Thermal Resistance Junction-to-Case	SOT-89	45	°C/W
	SOT-223	20	°C/W
	TO-252	12.5	°C/W
Junction Temperature	T <sub>J</sub>	150	°C
Storage Temperature	T <sub>STG</sub>	-40 to +150	°C
Lead Temperature & Time	T <sub>L</sub>	260°C, 10S	--

### Note:

1. These are stress ratings only. Stresses exceeding the range specified under Absolute Maximum Ratings may cause substantial damage to the device. Functional operation of this device at other conditions beyond those listed in the specification is not implied and prolonged exposure to extreme conditions may affect device reliability.
2. The Power Dissipation is :  $P_D = (T_{J(MAX)} - T_C) / R_{\theta JC}$

## Recommended Operating Conditions

Parameter	Symbol	Rating	Unit
Recommended Maximum Input Voltage	V <sub>IN</sub>	15	V
Recommended Operating Junction Temperature	T <sub>opr</sub>	-40 to +85	°C

### Fixed Voltage Output Version

#### Electrical Characteristics
